BLUE COMET Creped #0923C

PRODUCT DESCRIPTION:

Blue Comet SmartWipes® are manufactured through the process of hydroentanglement, in which highly absorbent cellulose is combined with polyester fibers, resulting in a synergistic blend that is free of chemical binders. The ultra-clean cellulose give this wipe its high absorbency and body, and the polyester fibers provide dimensional stability, strength and efficient wicking action. The creping process enhance the sheet's absorbency and provides irregularities in the surface that aid in trapping dirt and foreign matter. Cleanroom Grade: 1000. Also available with a plain surface.
