NEW PRODUCTS INTRODUCTION

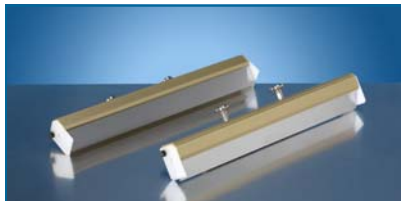

MPM ACCELA[®] PRINTER ACCESSORIES

JNJ Industries, the industry leader in stencil printer accessories and SMT production supplies introduces our newest line of accessories for the Accela[®] Stencil Printer from Speedline/MPM. The product line includes standard and high capacity SmartRoll[®] understencil rolls,

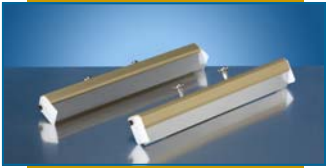

squeegee blade holders, metal squeegee blades and paste deflectors. All squeegees are also sold in complete assemblies.

In addition to the standard sizes offered by MPM, our SmartRolls are available in two different basis weight, lint free, non-woven fabrics that can be slit to specified widths or made with more or less linear feet of material to meet your specific printing requirements. Our squeegee holders are sold in sets of two and are available in lengths ranging from 6" to 24". The holders come in our standard gold anodized and in green anodized to designate use for lead free printing operations. Metal blades feature a proprietary ball radius for uniform paste deposition, reduced stencil wear, and long blade life. The stainless steel blades are plated with our proprietary Electrolyzed plating that aids in solder paste release for optimum print deposition while also making clean up faster and easier.
