AquaSonic® Cleaners

AquaSonic Aqueous Cleaner for Solder Paste & Flux Remover (AQP) is more than 90% water based with all ingredients being 100% active. It has been specifically formulated, using a proprietary electro-chemistry technology, to remove solder paste and flux residue in critical cleaning applications. SCAQMD Approved! AquaSonic Aqueous Cleaner for Surface Mount Applications (SMA) is a unique blend of modified alcohols and surfactants designed for ambient or heated stencil and misprint cleaning and defluxing in ultrasonic immersion cleaners and defluxing equipment.

OptiSmart® Flat Panel & Touch Screen Display Cleaner

JNJ's display cleaner was developed for all types of glass panel displays and touch screens. This optical-quality cleaning system safely and easily cleans fingerprints, smudges, dust, dirt, oils and other contaminants without scratching the most delicate surfaces. Our cleaner will not harm or remove protective finishes such as mirror or anti-reflective coatings. Ordering Info: SB12DC

The Perfect Complement

JNJ's SmartHolder was designed specifically for our SuperSaturated SmartWipes® canisters to keep them readily

available and easily accessible. Suitable for all professional environments. Ordering Info: SH1 and SH10

Our commitment is to manufacture consumable products that are environmentally stable and friendly throughout their entire life cycle. These products are in compliance with RoHS, Conflict Minerals, WEEE and REACH regulatory and statutory requirements.

Foil Refill Packs

Make everyday changes...reuse, recycle and reduce to protect the environment! Our complete line of SuperSaturated SmartWipes® is available in convenient, space saving and waste reducing Foil Refill Packs (FRP). These cost-efficient vacuum sealed foil bags allow the reuse of our canisters to significantly reduce your solid waste. The wipes guarantee that operators use the proper amount of solvent for optimum cleaning performance. After using the last wipe, simply remove the lid, open your FRP and drop-in a fresh refill of saturated wipes into the matching GlobalTech canister. Foil Refill Packs come saturated with 100 - 6" x 9" wipes.

GlobalTech®

Every cleaning job requires a specialist!

JNJ Industries offers the most effective and safest environmentally sustainable products to meet the needs of a growing world.

JNJ's GlobalTech Chemical Division delivers a complete line of innovative and unique formulations for use in electronic assembly manufacturing and precision cleaning applications. Our chemical portfolio of environmentally responsible solvents contain low volatile organic compounds (VOC), zero hazardous air pollutants (HAP) and global warming potential (GWP), and are CFC/HCFC free. Our cutting-edge cleaning technologies provide safer, better-performing, higher-quality and more eco-sustainable products in convenient delivery systems for optimum value and utility. As the complexity of the SMT PCB assembly continues to advance and the evolution of sensitive high-tech de-

VICES demand products that optimize performance, trust in our application specific chemistries to improve your cleaning efficiency and process. Ideal in a variety of cleaning methods such as; ultrasonic machines and batch defluxing systems, stencil and misprint cleaners or manual applications. Every step of the manufacturing, filling and shipping is handled under strict manufacturing controls, enabling us to offer products of the highest reliability to meet today's performance, compatibility and environmental requirements. We supply these products in a range of concentrations and in several packaging options including; drums, gallons, sprays, saturated wipes and foil refill packs.

environmentally safe family of products >>>

Isopropyl Alcohol & Isopropyl Alcohol w/ DI Water

Isopropyl Alcohol 99% (IPA) and Isopropyl Alcohol and Deionized Water, 70/30 blend (IPA/DI), are highly effective universal cleaners, degreasers and disinfectants. They remove most types of inks, pastes, fluxes, light oils and other contaminants associated with assembly, machining, soldering and printing. Ideal for use in surface preparation prior to manufacturing or assembly processes.

SMT Stencil Cleaner

Odorless • Fast Drying • Zero Residue • Non-flammable

SMT Stencil Cleaner (SMT) is an innovative formula that is safe, fast drying and odor free. Quickly and effectively removes all types of solder pastes and fluxes, UV curable inks, adhesives and thick films found in electronic assembly manufacturing. It is an excellent all purpose cleaner and overall degreaser. SMT has been approved for use by DEK in their solvent bar systems for their automatic stencil wiper assembly.

FR100SMT-12	Foil Refill Packs, 12/cs

Ink & Screen Cleaner

Ink & Screen Cleaner (IKS) removes conductive, resistive, and dielectric thick film inks, as well as commercial inks used in the electronics and commercial printing industries. This powerful cleaner safely removes pastes, silicones and flux residues without damaging fragile emulsions. Ideal for use as a general degreaser.

hand cleaners >>>

Benchtop, WorkStation & Industrial Hand Cleaners

Benchtop Electronic Hand Cleaner (BEHC) is a high performance, general purpose saturated wipe. Used at the workstation or any location where operator/technician's hands become soiled. Cleans hands without requiring the operator to leave the work area. Certified Ionic Contamination Test results show BEHC to be well within ANSI/J-STD-001 and MIL-STD-2000 Military Standards adopted to maintain acceptable levels of cleanliness in the manufacture of electronic assemblies, circuits and components.

WorkStation Hand Cleaner (HC-C) is a high performance, general purpose saturated wipe. Cleans hands, surfaces, fixtures and tools without requiring the operator to leave the work area. Citrus scent.

Industrial Hand Cleaner (HC) is a high performance, general purpose saturated wipe featuring a smooth side for lighter clean-ups and a textured side for tougher jobs. Citrus scent.

Toxic Metal Reduction: Due to a unique solvent/surfactant blend, coupled with a powerful chelant, our hand cleaners have been laboratory certified to be effective in the removal of lead and other toxic metals from all surfaces, including the skin. Designed for operators and technicians who routinely handle soldered printed circuit boards and assemblies, solder reflow, wave soldering, solder paste screening, tin/lead plating and hot air solder leveling process.

BIOACT® SC-10 Electronics Cleaner

BIOACT SC-10 Electronics Cleaner (BIO) is a mixture of highly-refined, polar and non-polar solvents designed for hand-wipe and immersion applications. Formulated to quickly remove uncured SMD adhesives and unreflowed solder paste from stencil and misprinted assemblies. Suitable replacement for IPA, hydrofluoroethers, hydrofluorocarbons, HCFC-141b and HCFC-225.

paste & flux removers >>>

Solder Paste & Flux Remover (PFR) is a highly effective defluxer/cleaner for R, RA, RMA, lead-free, no-clean, water soluble and OA solder paste and fluxes. PFR may be used straight for maximum cleaning power or diluted for use in dip or ultrasonic tanks.

Lead-Free Paste Remover (LFPR) is a safe, low cost cleaner for high tack and difficult to clean lead-free solder pastes, water soluble lead-free pastes and fluxes. LFPR dries at the right speed to enable complete cleaning without slowing down production.

Semi Aqueous Paste & Flux Remover (AFR) is a safe cleaner to remove water soluble, rosin fluxes, solder pastes and for general degreasing applications. It works quickly to remove tough organic contaminants such as soldering oils, waxes, silicones, uncured adhesives and other difficult soils found in electronic assembly manufacturing.
