Industrial & Lint Free Wiper Rolls

Industrial SelectaWipes 9" x 9", and 9" x 12", from JNJ offer a convenient and rugged roll of wipers for use in a wide range of industrial wiping and cleaning applications. They are made from durable non woven materials that are absorbent and strong even when wet. SelectaWipes are available in two sizes,

and have 125 tough cleaning wipes per roll. Sold in cases of 6 rolls. these wipes won't fall apart or shred when wiping down machinery, equipment or tools the way paper towels do. We also offer a Lint-free grade of

Heavy Duty Degreaser ~ Certified Clean Air Solvent by SCAQMD

Heavy Duty Degreaser (HDD) is an aqueous cleaner that is more than 90% water based with all ingredients being 100% active. It has been specially formulated to remove all types of grease, oil, grime, and dirt from all types of surfaces including machinery, engines, farm equipment, trucks, buses,

trains, tools, work benches, floors, walls, kitchens. HDD utilizes a proprietary electro-chemistry technology that works by reversing the normal polarity of the contaminant. The reversal of the polarity causes the like charges of the contaminant and the work surface to repel each other, thereby preventing

reattachment to the surface, enabling them to be rinsed or wiped away with ease. HDD has a unique ability to penetrate crevices and orifices to dislodge microscopic contaminants. This method of cleaning drastically improves the cleaning efficiency by minimizing the amount of rinse water needed.

AquaSonic® Aqueous Ultrasonic Cleaner ~ SCAQMD Certified

AquaSonic® UltraSonic Cleaner (AUC) is a concentrated aqueous cleaner that has been designed for use in all types of ultrasonic cleaning machines. Formulated to remove oils, grease, grime, cutting fluids and most materials and

substrate surfaces that are used in everyday manufacturing practices. It lowers surface tension, aiding in the performance of ultrasonic cavitation to remove soils from all types of mechanical parts and surfaces made from a variety

of materials including various metals, plastics, and other natural and synthetic materials. Certified Clean Air Solvent by SCAQMD with a VOC of .09, it meets the new specification of <25g/L VOC. Odor free and biodegradable.

Fleet and Mass Transit Clean

Aqueous General Purpose Cleaner / Degreaser ~ Low Freeze Formula

Fleet and Mass TRANSIT CLEAN is an aqueous general purpose cleaner / degreaser, with a **low freeze**

formula, specifically for use in all transportation vehicles. Transit Clean safely cleans grease, oil, dirt and

grime from interior and exterior surfaces areas, as well mechanical parts and there's no rinsing required.

PRODUCT HIGHLIGHTS:

- Cleans engines and machinery
- Cleans interior and exterior areas—doors, seats, hand rails, handles, floors, wheels and chains
- Safe on all ferrous and non-ferrous metals, plastics, vinyl, linoleum, ceramics, glass, Formica and most synthetic fibers
- Cleans tools and accessories

INDUSTRIAL PRODUCT OVERVIEW

Industrial Supplies & Cleaning Products

JNJ is the global trusted brand providing innovative products to industrial, electronics and manufacturing facilities, as well as commercial markets for two decades. We have grown from a small electronics accessory supplier into a large scale manufacturer of products that encompasses hand care and skin protectant products, industrial cleaning wipes and

chemistries, electronics screen-printing accessories, petroleum and heavy metal environmental remediation products, including private label and converting capabilities. Our products are manufactured from the highest quality raw materials sourced from major suppliers to produce superior quality products. We are dedicated to helping our customers maintain a

cleaner, safer work environment by providing high performance user and environmentally friendly products from our factory floor to your door. Our corporate core values of stressing customer satisfaction, adhering to the highest ethical standards and operational excellence has fueled our consistent growth.

SafetySmart® Hand Care & Skin Protectant Products

JNJ's SafetySmart® hand care and skin protectant line includes a Hand Sanitizer Lotion, Instant Foam Hand Sanitizer, and Hand Sanitizer Wipes. All products are alcohol and fragrance free, non-flammable and non-toxic. Effective protection anywhere germs or irritants are found. **SafetySmart® Hand Sanitizer** is a unique, patented, FDA compliant skin antiseptic containing a broad spectrum of antimicrobial activity that forms a protective film on healthy skin. Each protective molecule is surrounded by PERSISTENT antimicrobial activity to inhibit the growth of and kill a wide range of potential disease-causing bacterial pathogens and microor-

ganisms for up to 4 hours. As an over-the-counter waterless hand disinfectant, it can be used to provide protection where sinks are not readily available or in-between regular hand washings.

Alcohol based sanitizers dry your skin out, are highly flammable, and will sting cuts and abrasions. Our SafetySmart® brand of alcohol free sanitizers will not dry your skin out, will not burn, and will not sting. They will help to moisturize and condition your skin while providing effective protection against

germs for up to four hours after application.

The active ingredient in the SafetySmart hand sanitizer products is Benzalkonium chloride, which has been used in the hospital industry for over 50 years. It stays active on your skin until your skin naturally exfoliates, which for the average person is every two to four hours.

Industrial IPA & IPA/DI universal cleaner and disinfectant
100 wipes per canister

Industrial Isopropyl Alcohol SuperSaturated SmartWipes® (IPA & IPA/DI)

Isopropyl Alcohol is a non-aggressive universal cleaner and disinfectant. Our industrial grade wipe material offers the right balance of strength and absorptivity making it suitable for a wide range of industrial applications. They won't scratch soft surfaces yet have sufficiently active texture to clean surfaces of soil and

dirt. Our IPA & IPA/DI Water wipes are CFC and HCFC free, quick drying, with only a mild odor. They remove most types of inks, pastes, light oils and contaminants associated with assembly, machining, soldering, printing and most industrial cleaning applications. Ideal for use in surface preparation prior to assembly processes that

require various bonding agents such as glues and epoxies, or prior to painting or other surface finishes. Available in 99% pure and 70% alcohol with 30% DI Water. Also offered in 100-count canisters with premium wipes for critical cleaning applications, foil refill packs, gallons, drums and spray bottles.

...more choices to maximize cleaning performance. Offering three saturated wipe materials to suit most applications; dual action wipes, industrial wipes and premium wipes.

SmartWipes® Dry Wipes

JNJ manufactures a complete line of application specific wiper products for all cleaning and polishing applications. We use only the highest quality materials available, chosen specifically to deliver optimum performance and value for each and every use. Whatever your cleaning or wiping needs, JNJ has the

SmartWipe® to do the job. There are SmartWipes for clean-rooms, cleaning optics and for general purpose cleaning. In keeping with our commitment to innovation, we continue to develop new materials and prod-

ucts that will help serve the needs of our customers today and anticipate their needs for tomorrow.

Hand Cleaner

Our Hand Cleaner, with dual action wipes, is a high performance, general purpose cleaner with a chelating agent that cleans hands, surfaces, fixtures and tools without being required to leave the work area. Laboratory Certified to be effective in the removal of toxic metals from all surfaces, including the skin. Heavy and undetectable metals and contami-

nants are removed from the skin before absorption, preventing materials from being ingested into the liver, which can cause some forms of cancer. Use in service packs, at the work station, or any location where technicians hands become soiled. Dual Action Wipes feature a smooth side for lighter clean-ups and a textured side for tougher jobs.

PRODUCT HIGHLIGHTS:

- Effective in removing toxic metals
- Leaves hands soft & clean
- Dual Action Wipes Clean: hands, works surfaces, fixtures & tools
- Residue Free - amine, salt, & silicone free
- Enhances production/work time
- Fast drying
- Certified Ionic Contamination Test results show to be well within the ANSI/J-STD-001 Industrial and MIL-STD-2000 Military Standards adopted to maintain acceptable levels of cleanliness in the manufacture of electronic assemblies, circuits and components

JNJ's Hand Cleaners...effective in the removal of toxic metals from all surfaces, including the skin.

Smart-Bond® Encapsulating Polymer Absorbents

Smart-Bond® Encapsulating Polymer Absorbents are the highest quality of their kind in the world today. All meet FDA guidelines and contain no hazardous ingredients. Smart-Bond polymers can be used in tandem to clean-up combined spills of both hydrocarbon, aqueous liquids and water soluble hydrocarbons.

In just minutes, Smart-Bond transforms liquid hydrocarbons into a solid mass from which hydrocarbons do not leak or leach back into the earth.

Unlike absorbents that are commonly used and messy to clean-up, Smart-Bond is easy to use, makes clean-up faster, easier and safer and requires four times less the amount of material to effectively encapsulate and solidify the same quantity of spilled hydro-

carbon. This vapor suppressing absorbent technology assists to reduce liability through effectively reducing and stabilizing the hydrocarbon generated waste. These factors combined with quick, effective and complete spill control/clean-up and tremendous labor reductions, make Smart-Bond an extremely intelligent, cost effective remediation product.

Safely and effectively absorbs liquid hydrocarbons into a solid, manageable waste product. Encapsulates hazardous fluids into non-hazardous solids.

RUST-oration Rust Remover & Inhibitor

RUST-oration is an environmentally safe, user-friendly water-based product that removes rust in

minutes, without scrubbing. It works through selective chelation to restore rusted tools, machined parts, auto parts, even firearms to like-new condition. One gallon de-rusts up to 300 lbs. of steel. This is a process in which a large synthetic molecule forms a bond with metals and holds them in solution. Most chelating

agents bind many different metals, but the active ingredient in RUST-oration bonds to iron exclusively. Once the chelating agent has removed the iron, a sulfur bearing organic molecule pulls the iron away from the chelator and forms a ferric sulfate complex which remains water soluble. This frees the chelating agent to remove more iron from rust.

Rig Clean Aqueous Cleaner for Rigs & Heavy Equipment ~ Low Freeze Formula

Rig Clean is a ready to use, phosphate free, heavy duty aqueous cleaner/degreaser that cleans and safely breaks down heavy soils, such as crude oil, drill mud, sludge, grease and other contaminants that are commonly found in the petroleum industry and on heavy equipment and vehicles. This non-toxic

cleaner provides extraordinary cleaning power that is human and environmentally safe. Rig Clean has a **low freeze formula** that will hold up under low temperature conditions where flash ice storms present cleaning challenges. The unique surfactant based formula provides high wetting action that lowers sur-

face tension to power away stubborn soils. After washing, most surfaces require only minimal rinsing and will dry with no residue or slippery finish. This environmentally safe formula is water based, non-flammable, with very low VOC's and is safe for use on all water-safe surfaces.

JNJ Industries Supports Living Green

Rig Clean's Dual Action Wipes feature a smooth side for lighter clean-up and a textured side for tougher jobs.
